THE COMPANY PROFILE

The company **ENVIROTECH CONSULT LTD.** was created in 2005 in Rwanda as a construction firm with the main objective of providing expertise in the design, management and implementation of civil engineering projects specifically in the water, wastewater and solid waste sectors and hygiene promotion.

Following a recent global awareness, Rwanda has recently oriented its politics in achieving sustainable development of all sectors, and the management of our environment has become the main issue in the implementation of development projects. The company **ENVIROTECH CONSULT LTD** has then updated its objective in adding and committing itself in finding sound and effective solutions to the common environmental challenges we always face for the proper management of our environment, and finally promote the delivery of genuine products from overseas, in the field of civil engineering and environmental management.

ENVIROTECH CONSULT can effectively handle such assignments using its broad local and associate resource base and which makes us a strong and a cost-effective choice for the engineering studies.

The company is registered in Rwanda Revenue Authority under TIN no. 102236814 and has its head office in Kacyiru District, Kigali City Council.
